The Aga Khan University Hospital

The Aga Khan University Hospital

World-Class Quality Care in Pakistan

Trusted for
World-Class Quality

For the last 40 years, The Aga Khan University Hospital has been a symbol of trust and excellence in healthcare.

Built on lush green University Campus grounds spanning 83-acres, we are a JCI and CAP accredited, premier quaternary-care academic medical centre, offering world-class healthcare in Karachi, Pakistan.

Expect Exceptional Care

We offer specialised outpatient, inpatient, day-care, therapeutic and diagnostic services for our patients, delivered by our highly competent, attentive and compassionate staff. Our teams are highly experienced and internationally trained across the full range of hospital services.

Our multidisciplinary approach offers holistic, well-rounded care, allowing patients to benefit from our patient-centred care philosophy. Our care offering extends beyond our Hospital grounds. After your discharge, our Home Health Services ensures you are cared for, while in the city. After returning home, our doctors offer continuity of care through our digital health solutions, until you are well enough to return to your primary doctors.

Experience
Clinical Excellence

The breadth of our services, available all under one roof, together with the harmony of our doctors, surgeons, nurses and support staff allows us to adopt a multidisciplinary, comprehensive approach to medical treatment.

Our long-standing global accreditations are a seal of approval for our standards of quality and care. Our doctors, nurses and other staff are highly trained, often with sub-specialisations from abroad. They have a proven track record with complex cases, where their skill and experience ensure our patients receive the best possible medical treatment.

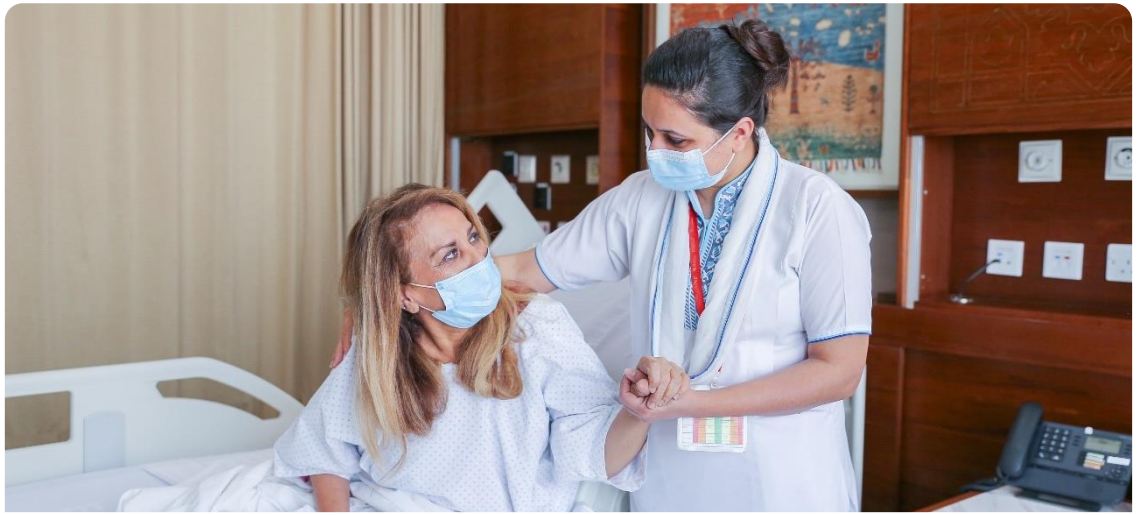

Our high-acuity special care and intensive care units are equipped with critical monitoring systems and staffed with highly trained teams for patients who require extra care and supervision during their treatment and recovery.

Feel Comforted and Relaxed

Whether you choose accommodations at our state-of-the-art, modern and exquisitely designed private rooms and suites at the Princess Zahra Pavilion, or choose shared or ward accommodations, you will receive specialised clinical services by our highly competent, attentive and compassionate staff.

At the Princess Zahra Pavilion, you can choose a single room or a deluxe suite - both modern, spacious and offering a calming lakeside view in a relaxed atmosphere. Each room is enhanced with comfortable, high-quality hospital furnishings, equipped with modern medical fixtures and fitted with advanced patient monitoring technology. Our deluxe suites also provide additional living space for patients and their families.

Enjoy Ease and Convenience

We understand that travelling for care can be stressful and overwhelming for patients and their families. Our warm and friendly concierge staff is here to support you and make the experience as smooth and easy as possible.

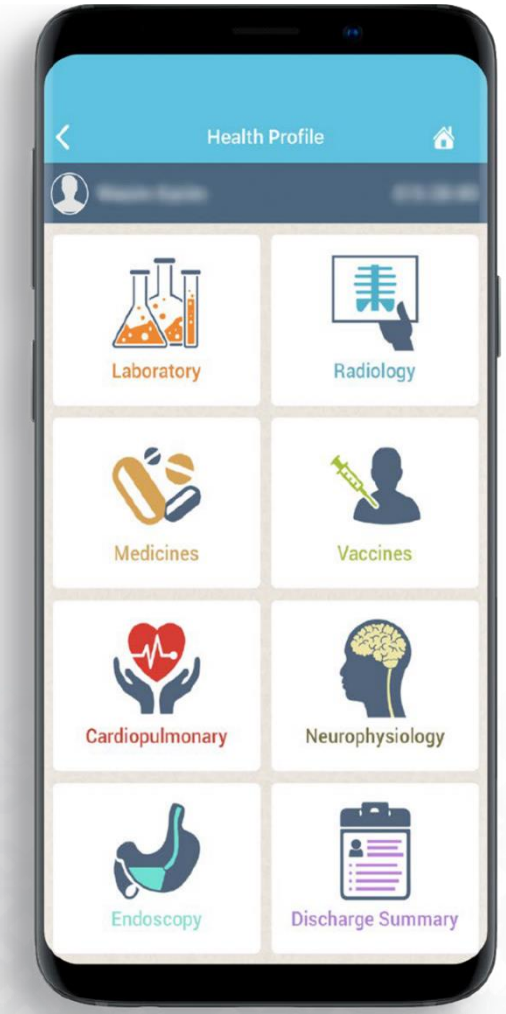

They are available to assist you and your family before, during and after your travel, coordinating a wide range of services including liaising with doctors and nurses, scheduling pre-visit appointments, medical record reviews, and arranging transportation and accommodation, along with various other travel-related and personal requests. With experience managing hundreds of patients from across the world, our team is well-equipped to take away all the logistical worries so you can remain fully focused on what matters the most: your recovery.

Find Comfort in Our Hospitality Culture

Pakistan is known for its hospitality and its culture of warm reception and treatment of guests. You will find your stay at AKUH no different. Our staff will ensure you have all the comforts you need during your stay. Our internationally trained master chefs work closely with our dietitians to carefully craft nutritious meals that comply with your medical and healing requirements, contributing positively to the healing process. Family and visitors may choose from a variety of delicious cuisines, ranging from our fine dining menu to fresh oven-baked pizzas to snacks and sandwiches.

Always Stay Connected with Our Digital Health Solutions

At The Aga Khan University Hospital, your care journey starts even before you arrive. We offer convenient teleconsultations and second opinions, allowing you to share medical reports and receive expert guidance from our specialists. You can browse our doctors' profiles on our website or allow our team help you find the right practitioner. Our treatment and services directory provides comprehensive information on the wide range of care solutions we offer.

Your care doesn't end when your visit does. With our tele-clinic services, follow-up consultations are just a click away—no matter where you are. Through our Family Hifazat App, you have secure access to all your health information, including medical records, lab and diagnostic reports, prescriptions, and discharge summaries—anytime, anywhere.

Learn More

As Pakistan's leading quaternary care hospital, your wellbeing is our top priority. From the moment you plan your visit to the time you return home, our teams are here to support you every step of the way — before your arrival, during your stay, with billing, insurance and paperwork, and in ensuring continuity of care after discharge. So, sit back and let us take care of the rest.

Our Clinical Programmes

Department of Dentistry

Department of Dentistry

- The Department of Dentistry at the Aga Khan University Hospital provides comprehensive care for a wide range of oral and maxillofacial conditions, combining clinical excellence with a patient-centred approach.
- It offers a full spectrum of treatments including preventive, restorative, cosmetic, and surgical procedures, with most services delivered in an outpatient setting and complex cases performed under general anaesthesia.
- The Department is equipped with state-of-the-art radiology services, including cone beam computed tomography, enabling precise diagnosis and treatment planning.
- Our highly trained dental specialists, including maxillofacial surgeons, orthodontists, and periodontists, work collaboratively to deliver personalised care to all patients.
- Multidisciplinary coordination with other specialties ensures effective management of oral pathologies, facial trauma, and congenital conditions, offering patients seamless care across surgical and medical needs.
- A strong academic foundation and clinical training framework underpin Dentistry's commitment to delivering high-quality, safe, and innovative dental care aligned with international standards.

Department of Emergency Medicine

Department of Emergency Medicine

- The Emergency Department at Aga Khan University Hospital operates 24/7/365, offering urgent and life-saving care for patients of all ages and medical conditions.
- It has one of Karachi's few dedicated Paediatric Emergency Units and a specialised Cardiac Emergency Bay.
- The AKUH Emergency Department operates on a robust triage system, where each patient is quickly assessed and prioritised based on the severity of their condition—ensuring timely and effective care, especially for life-threatening emergencies.
- The Department is staffed by highly trained and credentialed emergency consultants, senior medical officers, residents, and skilled nursing teams, all certified in Basic and Advanced Cardiac Life Support (BLS/ACLS).
- Multidisciplinary collaboration enables seamless coordination with other specialties, ensuring holistic, patient-centred care from initial emergency through to follow-up treatment.
- Accredited training and clinical supervision frameworks ensure the delivery of safe, efficient, and high-quality emergency care aligned with international best practices.

Department of Family Medicine

Department of Family Medicine

- The Department of Family Medicine at the Aga Khan University Hospital provides high-quality, cost-effective primary health care, focusing on preventive, curative, and rehabilitative services for patients of all ages.
- Highly experienced and certified Family Medicine Physicians offer personalised, compassionate care, promoting health and well-being in illness and in health.
- Comprehensive services include:
    - Wellness checks for men and women.
    - Family planning, well-baby clinics, and immunisations for children and adults.
    - Counselling for stress, pain management, and self-relaxation.
    - Pre-employment and annual check-ups, care for terminally ill patients, and geriatric clinics.
    - Pre-immigration exams and health insurance assessments.
- Specialised health packages tailored to patient needs, such as Executive Clinic, Women's Health, Men's Health, Over 50 Care, and Pre-Marital Screening.
- The Department collaborates closely with other hospital specialties, ensuring a multidisciplinary approach and coordinated care for patients.

Our Clinical Programmes

Department of Ophthalmology and Visual Sciences

Department of
Ophthalmology and Visual Sciences

- Our Department of Ophthalmology and Visual Sciences is home to a dedicated and highly skilled team of professionals, including ophthalmologists, surgeons, nurses, and technicians, who are committed to providing exceptional eye care.
- Our ophthalmologists, the majority of whom are trained abroad, bring world-class expertise in treating a wide array of eye conditions. They work closely with specialised nurses and technicians to ensure that every patient receives comprehensive, personalised treatment plans.
- The Department offers a full spectrum of services for both adults and children, addressing common and complex eye disorders such as cataracts, retinal issues, glaucoma, and more.
- Our surgical offerings include advanced procedures such as corneal transplants, retinal detachment repair, glaucoma surgery, cataract surgery and squint corrections, as well as facial and orbital reconstruction and refractive surgery.
- These services are typically provided in outpatient settings or daycare surgery, ensuring that most treatments are efficient and minimally disruptive to patients' routines. However, in complex cases, patients may need to stay overnight.
- The department’s commitment to cutting-edge care and patient-centred approaches ensures that all individuals, from children to adults, receive the highest standard of treatment, always.

Our Clinical Programmes

Department of Orthopaedics

Department of Orthopaedics

- The Department of Orthopaedics at the Aga Khan University Hospital provides comprehensive care for patients with bone, joint, muscle, tendon, ligament, and nerve conditions that affect mobility and quality of life.
- The Department offers specialised services through dedicated clinics such as the Sports Injury Clinic, Foot and Ankle Clinic, and Joint Replacement Clinic.
- The Department offers advanced surgical and non-surgical treatments, including trauma and fracture care, joint replacements, scoliosis and flat foot correction, bone and soft tissue tumour surgeries, limb lengthening, and paediatric orthopaedics.
- A multidisciplinary team of orthopaedic surgeons, supported by experts in radiology, physiotherapy, rehabilitation, pharmacy, and rheumatology, ensures coordinated and patient-centred care.
- Patients benefit from streamlined consultation services, daycare surgeries, and integrated pain management and occupational therapy pathways for optimised recovery.
- The Department is actively involved in teaching, training, and research, ensuring that services remain aligned with international best practices and the latest advancements in orthopaedic care.

Department of Paediatrics and Child Health

Department of
Paediatrics and Child Health

- Specialist team of experienced paediatricians, nurses, and allied health professionals providing comprehensive care for infants, children, and adolescents across a wide range of acute and chronic conditions.
- Multidisciplinary care with collaboration across departments, including critical care, paediatric emergency, specialised paediatric units, and advanced diagnostic services.
- Expertise in managing common and complex paediatric conditions such as neonatal disorders, infectious diseases, asthma, allergies, congenital abnormalities, developmental delays, and genetic conditions.
- Personalised care plans tailored to each child's medical, developmental, and psychological needs, combining evidence-based treatments, family education, and ongoing follow-up.
- Advanced diagnostic and therapeutic technologies, including neonatal and paediatric intensive care units (NICU/PICU), endoscopy, electrocardiography, genetic testing, advanced imaging, and minimally invasive procedures.
- Inpatient, outpatient, and day-care services for seamless paediatric care, from routine check-ups and immunisations to specialised diagnostics and treatments.

Our Clinical Programmes

Department of Psychiatry

Department of Psychiatry

- The Department of Psychiatry at the Aga Khan University Hospital offers compassionate, expert care for a wide spectrum of mental health conditions in adults, children, and adolescents.
- Multidisciplinary teams include psychiatrists, psychologists, nurses, speech and occupational therapists, and other specialists, ensuring comprehensive and culturally aware treatment.
- Outpatient services include:
    - Specialty mental health clinics for child, adolescent, adult, and geriatric care.
    - Therapy clinics for family, couples, parenting, and individual counselling for emotional and behavioural challenges.
    - Child Learning and Behavioural Clinic for collaborative assessments of developmental conditions, involving psychologists, speech therapists, and occupational therapists.
    - Psychological testing and assessments for conditions like ADHD.
    - Speech and occupational therapy services.
- Emergency and inpatient services provide safe, supervised care for individuals experiencing psychotic episodes, aggressive behaviour, suicidal tendencies, or requiring drug detoxification.
- A structured day-care programme supports rehabilitation efforts.

The Aga Khan University Hospital

Our Clinical Programmes

Department of Anaesthesiology

Department of Anaesthesiology

- The Department of Anaesthesiology at the Aga Khan University Hospital provides safe, ethical, and high-quality care for all surgical, critical care, and pain management needs.
- A highly skilled multidisciplinary team of anaesthesiologists, specialised nurses, and anaesthesia and surgical technicians ensures compassionate, comprehensive care at every stage of the patient journey.
- Services include:
    - Anaesthesia services for all surgical procedures, ensuring patient safety and comfort before, during, and after surgery.
    - Critical care support for patients in the Surgical Intensive Care Unit (SICU), working alongside surgeons and other specialists.
    - Pre-operative Anaesthesia Clinic for thorough assessment, screening, and optimisation of patients scheduled for surgery.
    - Acute and chronic pain management services in both inpatient and outpatient settings.
    - Treatment of complex pain conditions including cancer-related pain, joint pain, facial pain, post-amputation pain, and chronic back, neck, and shoulder pain.
    - Advanced interventional techniques such as epidural and nerve blocks, facet and sacroiliac joint blocks, neurolytic blocks, and radiofrequency procedures.
- The Department is dedicated to enhancing patient outcomes, improving quality of life, and advancing pain care through personalised, evidence-based interventions.

Our Clinical Programmes

Department of Pathology and Laboratory Medicine

Department of Pathology and Laboratory Medicine

- Highly experienced team of pathologists, technologists, and laboratory professionals delivering accurate, timely, and reliable diagnostic testing across a broad range of medical conditions.
- Comprehensive services across five key areas: Chemical Pathology, Molecular Pathology, Histopathology, Microbiology, and Haematology and Transfusion Medicine.
- Expertise in routine and advanced testing, including organ function panels, cancer diagnostics, infection detection, blood disorders, and genetic testing.
- Stringent quality assurance through a Total Quality Management System, ensuring precision and safety in every step of the testing process.
- Globally accredited laboratories (JCI and CAP) with advanced biosafety infrastructure, supporting safe and high-quality diagnostics.
- Same-day and real-time reporting of most test results, with critical findings communicated urgently to the treating physician.
- Reports interpreted by highly qualified pathologists, with integrated clinical insights to support accurate diagnosis and treatment planning.
- Strong academic foundation, with faculty engaged in ongoing research, education, and professional development for healthcare providers across Pakistan.

Our Clinical Programmes

Department of Pharmacy

Department of Pharmacy

- The Pharmacy Services at The Aga Khan University Hospital are among the most advanced and comprehensive in Pakistan, ensuring the safe and reliable delivery of high-quality, authentic medications through an extensive network of over 50 pharmacies across the country.
- Staffed by a team of highly qualified pharmacists and technicians who provide expert dispensing and patient counselling to ensure safe, effective, and optimal use of medications.
- The state-of-the-art pharmacy at the AKUH Main Campus includes sterile IV solution and cytotoxic drug preparation areas to ensure safety and accuracy.
- The AKUH Pharmacy is the first in Pakistan to implement centralised and decentralised clinical pharmacy services within hospital wards, reducing medication errors and improving distribution efficiency.
- With advanced systems in place, including Computerised Physician Order Entry (CPOE), modified unit dose drug distribution, and Therapeutic Drug Monitoring (TDM), precision and patient safety are at the core of service delivery.
- Accredited by the American Society of Health-System Pharmacists (ASHP) for its International Pharmacy Practice Residency Programme—first in Pakistan, and among few globally to receive this recognition.

Home Health Services

Home Health Services

- Offering expert care in the comfort of your own space, the AKUH Home Health Services are ideal for patients recovering from surgery, seeking post-operative care, or needing short-term specialised support. Our services are designed to make recovery convenient, private, and stress-free.
- We offer comprehensive medical services provided by experienced professionals. Our services include home visits from qualified physicians, surgical wound care, medication administration (IV, antibiotics), respiratory therapy, nebulisation, and more. We also provide support with daily living activities and vital signs monitoring to ensure patients stay on track with their recovery.
- Each care plan is customised to meet the specific needs of the patient and their family—whether for recovery following surgery or ongoing management of a chronic condition.
- Services available exclusively in Karachi.

Home Health Services

Key Home Health Services

- Long Stay Home Care: Postpartum/post-operative care (OB-GYN) | On-campus attendant | Palliative & geriatric care | Tracheostomy & portable ventilator care | Post-surgical support | BiPAP-assisted care | Neonatal stay-in care
- Home Nursing – Short Procedures: IV/SC/IM injections | Antibiotic & nebuliser administration | Wound, bedsore, chest tube & burn dressing | NG/OG/PEG/NJ tube insertion/removal | Catheterisation | PICC line care | Oxygen therapy | Suctioning | Drain & stoma care | Vaccine & sample collection | Hygiene care | Vital signs monitoring | COVID sampling | Wound consultation | Newborn baby care
- Physician Consultations at Home: Initial assessments | Follow-up visits
- Home Physiotherapy: Chest & limb physiotherapy | Stroke, orthopaedic, neuro & paediatric rehab | Parkinson's rehab | Pain management
- Medical Equipment: Purchase (Beds, oxygen units, suction machines, BiPAP/CPAP, monitors, walkers, wheelchairs, feeding/infusion pumps) and Rent (BiPAP/CPAP, oxygen concentrators, cardiac monitors, suction machines, manual/electric beds, ventilators)
