

Colon Cancer Screening Package

Package Price: PKR 43,450

Colon cancer, also known as colorectal cancer, is a type of cancer that develops in the colon (large intestine) or the rectum. It usually starts as small, noncancerous clumps of cells, known as polyps, that form on the inner lining of the colon or rectum. These polyps can become cancerous with time. Some risk factors for developing colon cancer include age, family history, inflammatory bowel disease, a diet high in red and processed meats, smoking, and obesity. You can have colon cancer without any symptoms. Be watchful if you notice any changes in bowel habits, blood in the stool, abdominal pain, and unexplained weight loss. If you or your doctor are concerned about colon cancer, avail this package for diagnosis and consultation with a Gastroenterologist.

Package Components:

- Consultation with a Gastroenterologist
- Colonoscopy screening with one biopsy

Terms and Conditions:

- Prices are inclusive of doctor's fee.
- All prices are in PKR on per person basis.
