

Child Development and Rehabilitation Center

Department of Paediatrics and Child Health

Packages for Group Therapy Session

Group therapy brings together skilled developmental specialists who guide children in engaging with peers of the same age or skill level. The aim is to transition them from individual therapy to more realistic scenarios, targeting goals set during one-on-one sessions. This dynamic approach facilitates social interaction among children, fostering mutual learning. Eligible participants range from 6 months to 18 years, encompassing various developmental disabilities like Autism Spectrum Disorder, Global Developmental Delay, Language Disorders, and more. While direct referrals are accepted, we advise a preliminary evaluation by a Developmental Paediatrician or Paediatric Neurologist. The frequency of group sessions is tailored to each child's needs, as recommended by their healthcare professionals.

Package A:

Rs. 5,000

- 2 group therapy sessions.
- All sessions should be availed within 1 month.

Package C:

Rs. 12,000

- 6 group therapy sessions.
