

Healthy Heart Advanced Screening Package

Package Price: PKR 54,500

High blood pressure or hypertension can cause headaches, shortness of breath and nose bleeds, which is how most people find out they have the disease. However, many more may never experience these problems even as hypertension is causing irreparable damage to them in the form of vision loss, heart or kidney failure and metabolic problems, leading to aneurysms, heart attack or stroke. This makes hypertension a “silent killer”. Get your annual checkups done. If you have a family history of hypertension, monitor your blood pressure regularly and in case of symptoms, do not forget to consult a doctor.

Package Components:

- Consultation with a Cardiologist
