Healthy Lungs

Advanced Screening Package for
Risk of Lung Cancer

Package Price: PKR 55,250

Lung cancer, also known as lung carcinoma, is a lung tumor characterized by uncontrolled growth of harmful cells in lung tissues. Left untreated, cancer can spread beyond the lung to other parts of the body. Lung cancer is a leading cause of death, especially in men but also in women. Smokers are at a higher risk of developing lung cancer, but non-smokers are also at risk, especially if exposed to secondhand smoke.

Symptoms of lung cancer may include coughing that gets worse or doesn't go away, coughing up blood, chest pain, wheezing, shortness of breath, fatigue and weight loss.

If you are a smoker or have a family history of lung cancer, get screened today.
