

**HEPATITIS** 

is treatable, still kills hundreds every day

## Hepatitis Screening Package

## Package Price: PKR 24,100

## Get Tested, Get Treated

Hepatitis is a serious liver infection that can be fully treated if diagnosed early. However, it is often a silent disease, which means that people may not have any symptoms until their liver is severely damaged.

There are many different types of hepatitis, but the most common are hepatitis B and hepatitis C. Both of these viruses can be transmitted through contact with blood or other bodily fluids.

If you think you may have been exposed to hepatitis, it is important to get tested. Testing is quick and easy, and can save your life. If you are diagnosed with hepatitis, there are effective treatments available. With early diagnosis and treatment, most people can live a normal, healthy life.

## Package Components:

- Consultation with a Gastroenterologist
- Laboratory Investigations

Fibro Scan
