Specimen Collection and Transportation Information

Test Name	Mnemonic	Section	Specimen Type
Bone Trepine	BONET	Hematology	Bone Trepine

- **Preparation of the Patient:** Instruct the patient about the test procedure, purpose, benefits and risks according to the specified guidelines. Prepare puncture site as for surgical incision. The aspirate slides, aspirate specimen, and bone marrow biopsy and venous blood sample (EDTA) for complete blood count are collected.
- **Type of Collection Container:** Purple top (for CBC), Purple top (for Bone marrow), Red top {for trephine:10% Neutral buffered formalin (100-150ml)}
- **Types and Amounts of Preservatives or Anticoagulants:**
 - K2 EDTA 7.2 mg (for blood & BM)
 - 10% Neutral buffered formalin (100-150ml) (For bone trephine)
- **Quantity of Specimen to be Collected:** 4ml (for blood), 1cc (for bone marrow)
 - **Minimum Quantity:** 2-3 ml (for blood), 0.5cc (for bone marrow)
- **Transportation Temperature:** 18 –25 °C for 8 hours, 2 – 8 °C after 8 hours
- **Need for Special Timing for Collection (where applicable):** NA
- **Specimen Stability Information:** 8 hours at room temperature (18 –25 °C)
- **Special Instruction:**
 - Medical officer will be responsible to perform this test
 - Prepare minimum 10 slides immediately
 - Patient history form
 - Consent form (optional)
 - Time out form.
 - Previous BM slides in case of post chemotherapy follow up marrow
 - Previous reports

Rejection Criteria:

- Unlabeled or mislabeled
- Identification mismatched between specimen and requisition slip.
- Hemolysis ,clotted blood sample
- Patient not properly prepared for test sample requirements.
- Improper collection container i.e., leakage or broken sample tube or container

Specimen Collection and Transportation Information

Test Name	Mnemonic	Section	Specimen Type
Bone Trepine	BONET	Hematology	Bone Trepine

- f) Improper preservative, or improper anticoagulant or medium in container.
 - g) Incomplete test requisition slip (i.e., required test information not present)
 - h) Blood specimen volume inadequate (QNS) for analysis
 - i) Specimen is from unacceptable source or wrong sample type
 - j) Wrong or inappropriate source given for testing
 - k) Excessive delay in specimen transport or improperly transported (i.e., not on required temperature)
 - l) Specimen contaminated with biological hazardous material
- **Need for Appropriate Clinical Data, When Indicated (Patient history):** Bone marrow procedure form, Consent form, and Time out form.
